

ZBA #7764 approved site plan showed one large structure 4' deep x 20' long x 8 ft high on the East side of the Sanctuary

These revised plans reallocate that coverage into 3 smaller columbarium structures 8 ft high (79.5 SF coverage) and add tables, benches, a small water feature all less than 36" high, thus not structures, and significant screening and landscaping to create a private memorial garden

# **GFC GARDEN PLAN** 1" = 4' FT
